Govt.

The Deputy Commr, Kurnool requests sanction to the proposal of the Chennagiri Municipal Council to construct a pond at an estimated cost of Rs 3,150/- in the bed of the Puttabasappa Kere tank for the use of the Cattle and other accidents of the town

The Municipal Council have agreed to meet half the cost and the other cost around Rs 1575/- Rs 1575/- have agreed to pay Rs 975/- each

Submitted for orders. 2) It is not known whether the land acquired has been considered as the Anantharaju of this Block for a drinking water pond. If the pond is proposed in the bed of a tank it is not known if this is necessary.

3) Engineer Member 29/7 whether we need to send Executive Engineer to see if well sunk in this tank is necessary or not. If so whether estimate, if received, may be considered.

Sir,

I have the honour to state that the Amildar President of Chennagiri Minor Municipal Council reports that the Mohomedan and Uppar residents of Chennagiri Town are put to much difficulty for want of a drinking water well near their localities and are sorely inconvenienced on account of the distance wherefrom they have to bring water and that it is very necessary to provide them with a well To create this facility, some of the townspeople and the municipal Councillors suggested that a pond in the bed of the Puttabasappanakere ~~with~~ in the Chennagiri Town would be very useful Accordingly, an estimate for Rs 3,150/- was got prepared with the necessary plans by the Executive Engineer The Municipal Council have agreed, in their meeting held on 21-4-1924 vide flag "A" to bear half the cost of the estimate and requested that the District Board may be moved to contribute the remaining portion of the cost) The matter was referred to the District Board, who resolved at their meeting held on the 5th December 1924 (Flag "B"), that a sum of Rs 750/- be sanctioned as their quota and the balance of Rs 750/- be met by the Taluk Board The Taluk Board have also agreed to bear the cost of Rs 750/- as suggested by the District

Board

Board (Vide Flag "C").

2. During my inspection of the Channagiri Town, it was ascertained that the inconvenience felt by the Mohomadan residents and others was real and that water facilities were urgently called for.

3. In these circumstances, I request that you will be so good as to obtain the sanction of Government to the proposals of the Board in the matter of the construction of a pond in the bed of the Puttabasappanakere. The estimate for Rs 3150/- and the duplicate plans received from the Executive Engineer and other vernacular file of records are herewith submitted for reference and return.

I have the honour to be,

Sir,

Your most obedient servant,

Deputy Commissioner,
Shimoga District.

Subject Construction of a pond in the bed of Puttabasappanakere at Chennagiri

Sir,

With reference to correspondence ending with your letter No L 285 dated the 14th July 1926 regardin the construction of apond in the bed of the Chenna iri Puttabasappa nakere, I have the honour to submit herewith the c nnected records together with the copies of the marginally noted correspondences and to state that from the resolution of the Chennagiri Municipal Council passed in their meeting held on the 13th August 1925 it would appear that while the improvement of the soppinabetta well would benefit one set of people the proposed honda is required for another set of people From my enquiries and local inspections during my inspection of the town of Chennagiri, I find there is good deal of force in the contention of the Municipal council The town of Chennagiri is situated that during the summer very great difficulty is felt for water not to speak of drinkin water A honda of the kind proposed is very necessary

2 The District Medical Officer in his letter No 1662 dated the 16th October 1925 has proposed certain works for the pond serving as a storage of drinking water The revised

revised estimate received from the Executive Engineer under cover of his letter No Dr 257 dated 4th July 1926 makes ample provision for the works suggested by the District medical Officer Besides the Municipal council have agreed to employ a watchman at their cost. The Amildar President will be asked to take necessary action in the matter of the removal of the huts and the blacksmith-shops referred to by the District Medical Officer

3 The executive Engineer as already stated has sent in a revised plan and an estimate The amount of the estimate comes to Rs 3028 and the Municipal Council of Chennagiri has agreed to bear half the cost while the Taluk Board of Chennagiri and the District Board have each agreed to contribute a sum of Rs 750/- The balance of Rs 14 will also be met by the Chennagiri Municipality. In these circumstances, I request that early sanction of Government might kindly be obtained for the proposal The work will have to be executed by the Department of Public Works as it is of a technical nature

I have the honour to be,

Sir,

Your most obedient servant

For Deputy Commissioner,
Shimoga District

12

Letter No 1662 dated 15/16th October 1926 from the District Medical Officer, Shimoga District to the President Municipal Council, Chennagiri

---

With reference to your No 76 dated 21st/30th August 1926, I have the honour to forward the following as my opinion regarding the construction of a pond in the bed of Puttabasappana kere tank in chennagiri town for drinking purposes

The tank is situated at the foot of the hill on which the town is situated. To prevent contamination of the tank from drainage and sullage water that may be coming from the town, a big trench must be provided at the apex of the triangle to deviate the flow of such water to the northern side of the bund

2. High parapet wall is to be provided all round the pond to prevent men and animals from contaminating the water. This is highly necessary as the tank is situated just by the side of the main road

3. The partition bund to be constructed must be high enough to separate the waters and the vent into the pond ~~should~~ must be situated at the southern portion towards Soppanthota well so that during summer, when water dries up, the two ponds will easily separate themselves

4 The deeper and descreet pond at the apex of the triahgle is to be amalgamated with proposed pond

5 The few huts and blacksmith shops situated on the up slope towards chennagiri should be removed

6 No cultivation should be encouraged as far as possible in the catchment area on the southern side

If the above details are attended to the pond proposed will serve for storage of drinking water
